

## livingskin™

Passive functional prostheses made with high definition silicone.

- Custom sculpting and painting ensure an individualized fit including:
  - Optimum match to users skin tone.
  - Personalized detail with hair, freckles, moles or scarring.
- The functional capabilities of the livingskin™ prosthesis can assist in Activities of Daily Living such as pushing, pulling, stabilizing, supporting, light grasping, and typing.
- Skin colour and other features are beneath the outer clear silicone layer to prevent fading.
- SeasonGuard® can help adjust the color to ensure match throughout the year.
- Adjustable armatures may be fitted to allow repositioning of each finger for specific tasks.
- Silicone provides a versatile, durable and virtually stain-proof prosthetic option.
- The livingskin™ prosthesis can be used as a complementary solution to a myoelectric prosthesis to alternate as desired.
